DIETARY RECORD

Name: _____

BRING THIS FORM WITH YOU TO YOUR APPOINTMENT!

A dietary record is used to assess nutritional intake relative to your individual needs. It also helps guide personalized recommendations.

Collect this data *before* your consultation. This saves time during the session, permits the nutritionist to do a more thorough job, and allows you to get more value from your appointment.

- Please record 3 or more days of food intake.
- Start each day on a new page.
- Eat as you normally eat!
- For greater accuracy, record as soon as possible after eating.
- Include as much detail as possible. Give complete descriptions and estimate all amounts.
- If applicable, record any symptoms related to eating (e.g., nausea, heartburn, bowel disturbances, fatigue, etc.) under "Observations."
- To gain insights into eating behavior, you may request a form on which to record information such as hunger level, mood, thoughts, and feelings associated with eating.

To Estimate Portions:

1 fist	=	1 cup
1 thumb tip	=	1 teaspoon
1 thumb	=	1 tablespoon
2 thumbs	=	1 ounce
palm of hand	=	4 ounces
tennis ball	=	1 cup
cupcake wrapper	=	1/2 cup
egg	=	1/4 cup
deck of cards	=	3 ounces
ping pong ball	=	2 tablespoons

Use this ruler to help measure the foods you eat and record.

- Use this assignment to learn awareness and nutrition

- Describe the details about what you eat
- Estimate quantities even if you are unsure
- Record one food item per line. Use the whole page
- Skip a line between meals and snacks
